

HATCH

LOAD AND DISCHARGE SIMPLIFIED

Hatch is Navis' next gen mobile application that is designed for hatch clerks to load and discharge containers from a handheld device. As part of the Navis Smart Mobile Suite, **Hatch** uses state-of-the-art mobile technology to provide an immersive mobile experience with a user interface designed to give hatch clerks 24/7 visibility and control over containers that need to be loaded and discharged from a vessel. **Hatch** is decoupled from N4 allowing it to be updated seamlessly without impacting the core TOS.

Hatch **Features**

Instant
Deployment

Real-time
N4 Updates

Offline Mode

Day and
Night Views

Which Give You

Better user experience

Hatch's intuitive and user friendly interface, combined with Day and Night Mode lighting, provide a seamless experience for your hatch clerks. The new app is specifically designed for hatch clerks to use on tablets making it very easy to find, load and discharge containers.

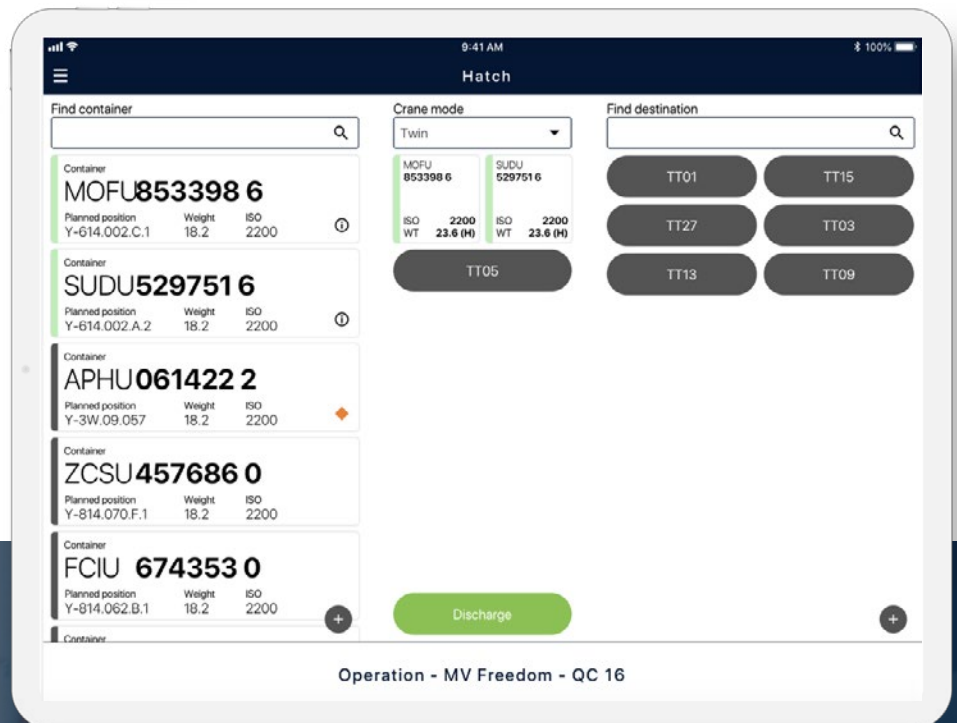

Lower deployment and maintenance costs

Since Hatch is a standalone mobile application, you don't need to update the TOS to get feature updates. Initial deployment and ongoing updates are seamless via download, without impacting the TOS.

Technical Requirements

- Navis N4 3.6 and above
- Android device running version 5 or above

Available by monthly subscription (includes M&S).
